Recruitment Manager

Ineo srl - Mercator

Andenne, Walloon Region, Belgium

Object : Application for the position of ERP, Web, and App Developer (Permanent Contract)

Dear Hiring Manager,

I would like to express my strong enthusiasm in applying for the position of « **ERP, Web, and App Developer** » at « **Ineo srl - Mercator** », as described in your advertisement. Attracted by your product vision - a robust, scalable ERP system at the heart of the business processes of several companies - I would like to put my technical skills and analytical abilities to work on a tool that has a tangible impact on users' daily lives.

In my current role, I develop and upgrade key software solutions such as TMS and BMS, strengthening my expertise in back-end, front-end, and functional analysis. I also contribute to the migration to an AWS cloud architecture, focused on automation, performance, and maintainability. These projects have taught me how to work on existing applications, ensure their stability, and propose relevant improvements. I have also gained solid experience in technical support, from managing common incidents to resolving complex issues.

Joining Mercator represents an opportunity for me to contribute to a comprehensive, structured, and constantly evolving ERP system. I am particularly motivated by the opportunity to develop my skills in C#/.NET and to work closely with project managers in an environment where software quality, functional consistency, and customer impact are priorities. Your approach to development — focused on a robust, scalable product designed for real-world use — is fully in line with my values and the way I like to work.

Curious, rigorous, and solution-oriented, I always strive to understand the business challenges behind each feature. I enjoy designing reliable, maintainable, and clearly documented solutions, while ensuring smooth communication with teams. My organizational skills, combined with my collaborative spirit, enable me to contribute effectively to the quality of a product that is used daily by many companies.

Thank you for considering my application. I would be delighted to discuss how my skills could contribute to the ambitions of the company. Please do not hesitate to contact me to arrange an interview.

Yours sincerely,

Samuel Barbeaux
