

Samuel Barbeaux

Experienced full-stack developer, transforming business requirements into scalable and secure applications, leveraging cloud technologies and DevOps practices.

Summary

With over 15 years of experience in full stack development, I design and integrate robust, scalable, and secure APIs. My work sits at the crossroads of software architecture and product engineering, to **transform complex challenges into concrete solutions**.

As a full stack developer at Henrotte s.a., a company specializing in logistics services, I **work across the entire lifecycle** of business software – from design to maintenance – to ensure technical solutions are aligned with operational needs.

Over the years, I have **collaborated with a diverse range of professionals, integrated modern cloud technologies**, and designed **scalable architectures** tailored to business challenges. My **rigorous, curious, and independent** approach guarantees reliable and secure solutions.

When I'm not immersed in technical challenges, I enjoy exploring new technologies, **analyzing emerging trends**, and **optimizing the way we work**.

Experience

Henrotte s.a. company

Full-Stack Developer & Technical Analyst

Henrotte s.a.

January 2007 – Present

Alleur, Liège, Belgium

Design and development of a logistics management system, covering the entire order-to-delivery cycle. Corrective and adaptive maintenance of an after-sales service system. Cross-functional IT support: business software, hardware, and network.

- PHP, Node.js, Symfony & API Platform, PostgreSQL & DynamoDB, Javascript & jQuery, Bootstrap & Tailwind, Jira & Bitbucket, CI/CD, Services cloud AWS

Projects

Transportation Management Software (TMS)

Henrotte s.a. company

January 2010 – Present

Alleur, Liège, Belgium

Development of a transport management system including order import, catalog management, storage, route planning, delivery tracking, and document generation. Integration with optimization tools and customer portals. Design and implementation of dashboards for logistics monitoring and optimization.

Booking Management System (BMS)

Henrotte s.a. company

March 2015 – Present

Alleur, Liège, Belgium

Design and implementation of a time slot reservation system to orchestrate and optimize inbound and outbound flows. The solution takes into account operational constraints (areas, volumes, resources) and integrates seamlessly with enterprise software and customer portals.

Cloud Architect & DevOps

Henrotte s.a. company

September 2020 – Present

Alleur, Liège, Belgium

Transition from a local monolithic architecture to a modern cloud architecture on AWS. Cost optimization through the adoption of the serverless model. Deployment aligned with DevOps best practices: CI/CD, monitoring, and enhanced security.

Helpdesk & Technical Support

Henrotte s.a. company

January 2021 – Present

Alleur, Liège, Belgium

Business software support, Microsoft 365 tools (Intune, SharePoint), and IT hardware. Incident management using Jira, from Level 1 (simple issues) to Level 3 (complex incidents). On-site or remote interventions to maintain business continuity.

Education

University of Liège

Computer science

ULiège

Graduated in 2006

Bachelor of science in computer science (4y)

Education preparing for a career as a systems designer capable of analyzing, developing, and testing complex information systems, integrating hardware, software, project management, and documentation across diverse domains.

- Programming, Algorithms, Applied Mathematics, Databases, Systems, Networks

Ans, Liège, Belgium

+32 478 70 58 69

Skills

Architecture & Development

Architecture design, functional analysis, resource evaluation, deliverable scheduling, and full-stack development.

- Monolithic, Microservices, Serverless, SOA, CRUD, PHP Frameworks, JS&CSS Frameworks

Programming languages

Expertise in web programming languages, scripting, and automation.

- PHP, JavaScript, Python, HTML, CSS, Bash

API & Interoperability

API design and implementation for interoperability across heterogeneous systems.

- REST, SOAP, Open API Specs

Cloud & DevOps

Deployment of serverless solutions on AWS, infrastructure as code, CI/CD pipelines, and containerization.

- Lambda, API Gateway, S3, SQS, CloudFormation, CI/CD, Docker

Support & maintenance

User support, incident management, and application maintenance.

- Helpdesk, Ticketing

Data systems & research

Expertise in relational and NoSQL databases, including optimization and indexing.

- PostgreSQL, PL/pgSQL, DynamoDB

Testing & Software Quality

Tests unitaires et fonctionnels fiables.

- PHPUnit, Postman, Newman, PHPStan

Methodologies & Collaboration

Agile project management in a collaborative environment, leveraging appropriate tools.

- Agile, Git, Jira, Confluence, Microsoft 365

Soft Skills

Ability to communicate, collaborate, solve problems, adapt, and manage time effectively.

Languages

French

Native language.

Technical English

Documentation, written communications.

Interests

Research and Development

Artificial intelligence & automation
